

Program for Nurturing Global Leaders in Tropical and Emerging Communicable Diseases

The 3rd Leading Program International Symposium

Aspergillosis, a threatening fungal infection: Current progress from bench to bedside

Friday, February 6, 2015 18:00 – 20:00

Main Seminar Room, Nagasaki University General Research Building 1F *Next to ITM (Nekken)

Program:

**1) Introduction:
Aspergillosis and its current problems**

Koichi IZUMIKAWA, M.D., Ph.D.
Department of Infectious Diseases
Nagasaki University Graduate School of Biomedical Sciences

2) *Aspergillus fumigatus* and its cryptic species

Akira WATANABE, M.D., Ph.D.
Division of Clinical Research
Medical Mycology Research Center
Chiba University

3) *Aspergillus* spp. and its drug susceptibility

Masato TASHIRO, M.D., Ph.D.
Department of Infectious Diseases
Nagasaki University Graduate School of Biomedical Sciences

**4) Pathogenesis and treatment of chronic pulmonary
Aspergillosis**

Takahiro TAKAZONO, M.D., Ph.D.
Department of Respiratory Diseases
Nagasaki University Hospital

**5) *Aspergillus fumigatus* adherence and
biofilm formation- a new drug target?**

Donald SHEPPARD, M.D. FRCPC
Division of Infectious Diseases and Departments of Medicine
Microbiology and Immunology
McGill University

Nagasaki University Graduate School of Biomedical Sciences, Leading Program Support Office
